Berkeley, CA | ziying-chen@berkeley.edu | +1 (510) 387-2571

EDUCATION

University of California, Berkeley

Berkeley, CA

Master of Analytics

Expected Aug. 2026

- Relevant Coursework: Data Modeling and Simulation, Machine Learning, Supply Chain Management, Optimization Analytics

University of Edinburgh

Edinburgh, Scotland

Bachelor of Arts in Business with Marketing; **First Class Honours**

May. 2025

- Relevant Coursework: Management Science and Operations Analytics, Strategic Management, International Marketing

EXPERIENCE

GenAIx

Jun. 2026 - Present

Marketing Intern, Marketing Department

- Conduct market and competitor intelligence across AI upskilling platforms to identify positioning gaps, customer segments, and commercialization opportunities, supporting product value proposition refinement and B2B go-to-market strategy.
- Plan and execute cross-channel marketing campaigns across LinkedIn, TikTok, email, and digital channels; monitor engagement performance and iterate content strategy to strengthen brand awareness and audience growth.

University of California, Berkeley

Jun. 2026 - Present

Research Assistant

- Analyze stakeholder needs and benchmark course management solutions to identify user pain points, operational gaps, and product requirements; support roadmap planning and cross-functional execution for a university enrollment management system

Ipsos

May – Aug. 2024

Market Research Analyst Intern, Marketing Understanding & Innovation Department

- Ran SQL extractions and SPSS statistical analyses on 50,000+ consumer survey responses; conducted competitive research and delivered segmentation and brand performance insights to 3 global FMCG clients, reducing insight turnaround time by ~25%
- Led end-to-end concept and product validation for Unilever shampoo; built structured analytical frameworks across awareness, purchase intent, and usage metrics to evaluate product and campaign effectiveness, directly shaping advertising, merchandising and go-to-market strategy

TikTok

Jul – Sep. 2023

Product Operations & Product Marketing Manager Intern, Global Product Solutions & Operations Department

- Designed and executed an A/B testing comparing video vs. carousel ad formats across 30+ global campaigns
- Queried campaign performance data via SQL and analyzed CTR, CVR, CPA, and ROAS in Python — carousel ads outperformed video formats by 18% in CVR — identifying high-performing verticals and product insights that informed product positioning and go-to-market rollout strategy
- Collaborated cross-functionally with Sales and Client teams to recruit 8 interactive ad feature case studies; documented SOPs, utilized dashboards to extract campaign metrics, and formulated product guidelines that drove feature adoption by 5%+

China International Marine Containers (GROUP) Co., Ltd.

Jun – Jul. 2023

Data Analyst Intern, AI Low-Carbon Energy Technology Centre

- Wrote SQL queries to extract operational energy data from platform databases; built Power BI dashboards tracking performance KPIs and efficiency metrics, directly supporting client-facing demonstrations and product commercialization and adoption

PROJECTS

AI-Powered Data Analytics Agent — LangChain / Claude API / Streamlit

Mar – Jun 2026

- Developed a multi-tool LangChain ReAct agent integrating SQL query module, Python code executor, and Matplotlib visualization pipeline; agent accepts natural language business questions and executes data workflows via Claude API
- Built Streamlit interface with CSV/database upload and real-time analytics; compressed estimated 2-week build to 3 days using Claude Code, supporting anomaly detection, forecasting, and YoY/MoM analysis with 89% intent accuracy

Retail Operations Analytics & SQL Database Design

Sep – Dec. 2025

- Designed a normalized OLTP schema for a multi-location café integrating sales, loyalty programs, inventory, and staff operation
- Developed Python ETL pipelines and interactive dashboards with dynamic filters (date range, location, and product category) tracking revenue, inventory, and loyalty tier contributions to support operational monitoring and strategic decision-making

E-commerce Customer Segmentation & Growth Analytics

May – Aug. 2024

- Processed 500,000+ e-commerce transactions through data cleaning, feature engineering, and feature selection in Python
- Authored a research article on machine learning approaches for customer segmentation and targeted marketing strategy, research accepted by 2024 International E-commerce & AI Conference

SKILLS

Programming Languages: SQL (window functions, CTEs, aggregations), Python (Pandas, NumPy), Power BI, Tableau, Excel (VLOOKUP, Pivot Tables), Claude Code, LangChain, SPSS

Business Skills: Data Modeling, Dashboard Development, A/B Testing, Product Marketing, Market Research, Growth Strategy, Cross-functional Collaboration, Business Performance Analysis

Languages: English, Mandarin
