EDUCATION

University of California, Berkeley

Berkeley, CA

Master of Analytics

Aug. 2026

- Relevant Coursework: Data Modeling and Simulation, Machine Learning, Supply Chain Management, Optimization Analytics

University of Edinburgh

Edinburgh, Scotland

Bachelor of Arts in Business with Marketing; *First Class Honours*

May. 2025

- Relevant Coursework: Management Science and Operations Analytics, Strategic Management, International Marketing

EXPERIENCE

PivotBridge.AI

Jul. 2026 – Present

Founding Team Product Marketing & Growth Intern

- Owned go-to-market strategy for the company's AI career intelligence platform, conducting market and competitor intelligence to define brand architecture, channel distribution plan, and positioning framework, now adopted as the team's GTM playbook
- Built and scaled the content and channel growth engine, independently producing and publishing brand and product content that grew 50+ subscribed users in the first month
- Contributed to investor pitch deck design and produced product demo videos used in fundraising and investor conversations

GenAIx

Jun. 2026 - Present

Marketing Intern, Marketing Department

- Executed cross-channel marketing campaigns across LinkedIn, TikTok, Instagram, and digital channels; monitor engagement performance and iterate content strategy to strengthen brand awareness and audience growth
- Built AI marketing automation system integrating n8n, Notion, and LLM, architecting scalable workflows across market intelligence, content generation, and video production to accelerate content planning and scalable marketing execution
- Designed a dual-pipeline HubSpot CRM to manage small-startup and medium-company sales pipelines

Ipsos

May – Aug. 2024

Market Research Analyst Intern, Marketing Understanding & Innovation Department

- Ran SQL extractions and SPSS statistical analyses on 50,000+ consumer survey responses; conducted competitive research and delivered segmentation and brand performance insights to 3 global FMCG clients, reducing insight turnaround time by ~25%
- Led end-to-end concept and product validation for Unilever shampoo; built structured analytical frameworks across awareness, purchase intent, and usage metrics to evaluate product and campaign effectiveness, directly shaping advertising, merchandising and go-to-market strategy

TikTok

Jul – Sep. 2023

Product Operations & Product Marketing Manager Intern, Global Product Solutions & Operations Department

- Designed and executed an A/B testing comparing video vs. carousel ad formats across 30+ global campaigns
- Queried campaign performance data via SQL and analyzed CTR, CVR, CPA, and ROAS in Python — carousel ads outperformed video formats by 18% in CVR — identifying high-performing verticals and product insights that informed product positioning and go-to-market rollout strategy
- Collaborated cross-functionally with Sales and Client teams to recruit 8 interactive ad feature case studies; documented SOPs, utilized dashboards to extract campaign metrics, and formulated product guidelines that drove feature adoption by 5%+

China International Marine Containers (GROUP) Co., Ltd.

Jun – Jul. 2023

Data Analyst Intern, AI Low-Carbon Energy Technology Centre

- Wrote SQL queries to extract operational energy data from platform databases; built Power BI dashboards tracking performance KPIs and efficiency metrics, directly supporting client-facing demonstrations and product commercialization and adoption

PROJECTS

AI-Powered Data Analytics Agent — LangChain / Claude API / Streamlit

Mar – Jun 2026

- Developed a multi-tool LangChain agent with SQL, Python execution, and visualization pipeline for natural-language business analytics; built with Claude Code in 3 days versus an estimated 2-week build, handling anomaly detection and YoY/MoM analysis with 89% intent accuracy

E-commerce Customer Segmentation & Growth Analytics

May – Aug. 2024

- Processed 500,000+ e-commerce transactions to build a customer segmentation model for targeted marketing strategy using Python; research accepted by 2024 International E-commerce & AI Conference
